Our reference DKW/xxxxxxx

Dear Mr. Paassen,

With reference to your declaration and our evaluation of the construction and production proces of the barrier layer of your SLA pipe product, we hereby inform you as follows;

- Diameters up to 160 mm of the SLA piping product of

egeplast international GmbH

have been certified for the scope: "PE pipes with wrapped aluminium layer for transport of drinking water in polluted soil"; Guideline BRL 17101.

Pipe product certificate no. K5155/03, 2010-04-15

- All diameters (90 -630 mm) of this product have, for the barrier layer, the same construction and same production process.

Therefore bigger diameters than 160 mm will have the same value for the barrier aspect as the certified pipe products.

Yours faithfully,

Kind Regards,  
Kiwa Nederland B.V.

L.J. van Driel  
Unitmanager Plastics Piping Systems
